

NUNNER
LOGISTICS

OUR NAME IS A PROMISE

OUR COMPANY

Founded in the wine region of South Styria, Austria in 1955, the corporate headquarters of NUNNER Logistics is currently headquartered in Helmond, The Netherlands. Nunner designs, develops, integrates, markets and operates advanced logistics solutions used by customers – in all ranges of industry and trade – to create a transparent, costefficient, and reliable supply chain and distribution system. Facilities are located in Germany, Russia, Switzerland, Spain, Czech Republic, Lithuania, Estonia and The Netherlands

AGRIBUSINESS

Nunner understands as no other how logistics are a critical part of the agricultural flows and how the supply chain should guarantee the availability, timing, traceability and quality of goods. Nunner secures the reliability of the delivery process itself, especially with respect to delays and uncertainty in time, quality and availability of service and risks of interruption. Nunner delivers food, perishables, seeds and cropprotection to the right place, at the right time, efficiently at competitive cost.

CHEMICALS & AGRIBUSINESS

With compliance and safety embedded into the Nunner values, understanding our customers' requirements in delivering safe and fully compliant services Nunner takes care of your business. We're a specialist in the safe x-docking, handling and transport of harmless and dangerous goods. Working with our chemicals and agribusiness customers, we've developed an efficient, compliant and transparent suite of logistics services. Nunner has deep experience improving supply chain management for leading U.S. and European chemical, paint and agribusiness companies. We understand the market and regulatory forces affecting this industry and can adapt our operations to maximize safety and effectiveness. Nunner was assessed by Lloyd's Register to evaluate our safety, security, quality and environmental standards according to Cefic's Safety and Quality Assessment Systems (SQAS).

HAZARDOUS CARGO

The term hazardous materials is applied to all substances and objects whose transport may represent a potential threat to the environment, humans, animals and public safety and order. The transportation of hazardous materials is therefore subject to various legal regulations depending on the mode of transport. The regulations concerning classification for the relevant mode of transport determine whether a substance or object is a hazardous material. For roadfreight the ADR regulations are applicable. Nunner moves hazardous cargo via both LTL and FTL Nunner practises its own Dangerous Goods Safety Advisors (DGSA) and ADR specialist. They offer shippers all the advice that is required. A shipper's or customer's Dangerous Goods cargo will be checked promptly and accurately. Legal requirements concerning all of the countries and ports related to transport are taken into account.

CHEMICALS

Nunner offers safe, efficient and sustainable logistics for the chemical industry. Ensuring safe transport and handling of its products, with care for the environment and in full accordance with regulations. We understand that this is of key importance for the image and reputation of the chemical industry. Nunner offers excellence in supply chain operations, with the aim of achieving higher efficiency, making better use of available resources and reducing the impact on the environment. We balance costs, service levels, flexibility and sustainability by offering greater horizontal and vertical integration along the supply chain to improve efficiency and productivity and to ensure better asset deployment. We have a continuous focus on sustainable logistics strategies and concepts and we work constantly on the improvement of operational safety and security. Training and process excellence programs are part of our culture.

In addition, Nunner ensures safe transport by observing the relevant stowage and segregation requirements of dangerous goods. This gives additional safety to the cargo, our warehousestaff, our drivers and the overall environment. Nunner's DGSA's are also available to discuss all issues with regard to the different international and domestic regulations and help customers find solutions for special arrangements and exemptions via our relations to the authorities in countries around the world. All our hardware and staff (X-docks, X-dock staff, Trucks and truckdrivers) are fully in conformity with international regulations. Each driver has his ADR-license and knows how to handle dangerous goods and what to do in case of emergency. All trucks and hauliers are audited twice a year in order to verify if they are still in accordance with international regulations and the even more strict Nunner regulations. Nunner has several DGSA officers and a "Dangerous Goods Specialist" (highest degree) in the company and the x-docks are equipped with ADR safes.
